SQL For Data Science

Issuing organization: Bangladesh Leadership Center (BYLC)

Credential ID: 184,937

Introduction to Cybersecurity

Issuing organization: Cisco Networking Academy

Credential ID: 1018116572

Projects

Multiple disease prediction System: [\[Live\]](#)

For the consumer, this web app provides the prediction of diabetes, heart disease, Parkinson's disease, and breast cancer with average 95% accuracy. I used different machine-learning algorithms and select the best one for this stream-lit web app

Ruby Voice Assistant: [\[Github Link\]](#)

This app provides an interface to give commands about what they want to do using this voice assistant. Like, Hey Ruby! write a note. I've used Python programming language to develop it.

National Parliament House: [\[Github Link\]](#)

It's a simple graphical representation. The objective of the representation is to display our parliament house. I used C++ as a programming language and GLUT (OpenGL Utility Toolkit) to construct the graphical interface.

Skills

Programming Language:

C, C++, Python, HTML, CSS

Core skills:

MySQL, Firestore, Web Scraping, Excel/ Google Sheets, A/B Testing & Experimentation, Tableau, Python (Pandas, Scikit-learn) Google Analytics, Leadership Experience.
